SUMMARY

Passionate and skilled Flutter Developer with strong experience in building scalable mobile applications using Flutter, Firebase, Supabase, and Riverpod. Known for delivering user-focused, reliable, and high-performance apps. Adept at problem-solving, cross-functional collaboration, and continuously learning to improve product quality and user experience.

EXPERIENCE

Flutter Developer, Aba Jifar Technologies Sep 2024 — Present

- Designed, developed, and deployed Jimmiti Delivery App, a modern delivery platform built with Flutter and Firebase, optimizing user experience for delivery tracking and order management.
- Collaborated with cross-functional teams to ensure seamless app performance, UI/UX excellence, and real-time database integration.
- Conducted extensive testing and debugging to ensure app stability and enhance overall user satisfaction.

Flutter Developer, Nova Tech Mar 2025 — Present

- Serving as the lead frontend Flutter developer, collaborating with a fast-paced, experienced team to build high-quality mobile applications.
- Designing and implementing scalable, user-focused UI/UX with clean architecture and best practices.
- Working on exciting projects leveraging Flutter, Firebase/Supabase, and modern state management to deliver high-performance, reliable apps under tight deadlines.

KEY PROJECTS

Green Delivery App

Built a full-featured delivery app using Flutter, Firebase, and Riverpod, with Chapa payment integration for secure and smooth transactions. The app provides real-time order tracking, secure payment, and an intuitive customer experience.

JiThub – AI Integrated Educational App

Created a powerful platform for university students featuring student ID registration, study AI assistant, class scheduling, grade calculators, and reminders. Focused on helping students manage their academic life efficiently with smart AI tools.

JMarket – E-commerce Platform

Developed a scalable marketplace using Flutter, Supabase, and Riverpod. The app supports product listings, real-time database updates, user authentication, and smooth checkout experiences. Prioritized security and performance for an optimized shopping experience.

Eye Clinic Management App

Engineered a patient management system for an eye clinic to handle patient records, appointment scheduling, and revenue tracking. Helped the clinic digitalize its operations and improve service efficiency.

RentBet – Home Rental App

Built a real-estate mobile platform connecting property owners and renters. Integrated a real-time chat system allowing users to communicate securely inside the app, enhancing customer trust and transaction speed.

Echolog – Mood Tracker & Voice Journaling App (Published on Play Store)

Built and published a user-centered mood tracking and voice journaling app on the Play Store, enabling users to record, track, and reflect on their emotions through voice notes, daily streaks, and vault storage. Integrated AI-powered feedback, English voice transcription, and mood analytics with Flutter, Firebase/Supabase, and Riverpod.

EDUCATION

Jimma University Bachelor of Science in Computer Science Expected Graduation: 2027

Actively participating in academic projects, building real-world applications, and sharpening programming and software development skills.

SKILLS

- Dart (Flutter), JavaScript (React, Node.js), TypeScript
- Flutter, Riverpod, Firebase, Supabase, React.js, Node.js, Express.js
- Git, GitHub, MongoDB, Firebase Authentication, Firestore, Supabase Auth, Chapa Payment Gateway Integration, REST APIs, Figma (for UI/UX prototyping), VS Code
- Excellent communication skills, Strong problem-solving abilities, Critical thinking, Team collaboration, Adaptability and continuous learning, Attention to detail
